ZADK

What is Moodle?

Moodle is an online Learning Management System (LMS) where you can access all your course materials, submit assignments, take quizzes, and communicate with your instructors and classmates.

It's designed to make learning more organized and accessible, whether you're in class or studying from home.

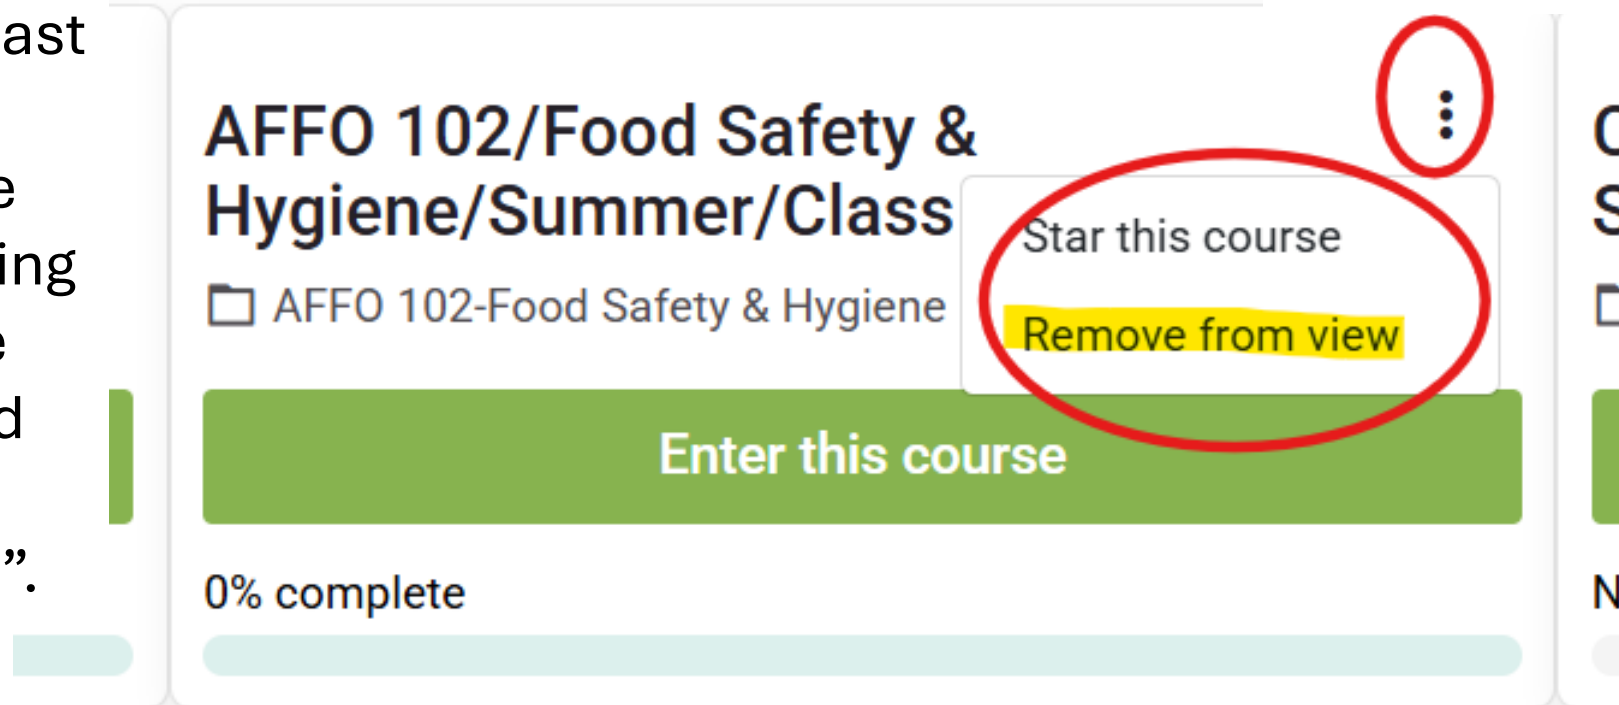

Dashboard

- This is how your dashboard will look like as you log-in
- You will be able to view/access your currently enrolled courses

The screenshot shows the user's dashboard after logging in. At the top, there is a header with the ZADK logo and name in Arabic and English, navigation links for 'Home' and 'All Programs', a language selector set to 'EN', and icons for notifications, chat, and search. Below the header is a green banner with the word 'Dashboard' and a home icon. The main content area is titled 'Course overview' and includes filters for 'All', a search bar, and sorting options. Three course cards are displayed: 'ACLY 111/Kitchen Management/Spring 2025/intake8.1', 'ACLY 206/Garde Manger-1/Summer/Class - 1', and 'ACLY 208/Saudi Cuisines -2/Summer/Class - 1'. Each card has a checkbox and a green progress bar at the bottom. A blue circular icon with a person symbol is visible on the right side of the course cards.

If you happen to see a course from your past semester, you can remove that course from view by pressing on the 3 dots in the top right corner and then choosing “remove from view”.

If you have accidentally removed a course from your dashboard, you can easily restore it by searching for the course using the search bar on the dashboard and re-adding it to your view.

Course Overview

الأكاديمية السعودية لفنون الطهي
Saudi Culinary Arts Academy
